

## **NeighborWoods Service Project**

Time: 9:00 am to Noon

Cost: Free

Min/Max: 6/16

Plant trees with children at a public school in Shreveport.

The *NeighborWoods* Program goals are to increase volunteerism to benefit urban forests, disseminate information on best practices in the field, replicate the *NeighborWoods* concept in additional communities, and build a national collaborative network of community tree-planting organizers. The Alliance for Community Trees facilitates this community-changing program.

## **Earthworks, Earth Science Workshop**

Time: 9:00 am to noon

Cost: \$25.00 (includes book)

Min/Max: 10/20

Find some interpretive pearls in this educator training workshop.

Developed by park naturalists Judy Sneed and Lisa Wright, this workshop provides instruction in the basic elements of earth science and introduces ideas and activities that may be incorporated into field trip programs. Topics include mineral structure, mineral uses, rock types, the rock cycle, fossils, geologic time and dinosaur tracks.

## **Waste In Place Training Workshop**

Time: 1:00 pm to 5:00 pm

Cost: \$40.00 (includes book)

Min/Max: 10/36

Participate in hands-on activities during this educator training workshop.

Keep America Beautiful's *Waste in Place* curricula are professionally developed materials created to help tomorrow's decision-makers understand solid waste and litter issues. *Waste in Place* is an elementary school curriculum supplement for teachers and students, focusing on litter prevention and responsible solid waste practices. The curriculum supplement for grades K-6 contains 33 lesson plans on many diverse subjects, including litter prevention, waste reduction, recycling, landfills, and much more.
